It Jamison was able to push to get this data this afternoon. See provided information below.

David

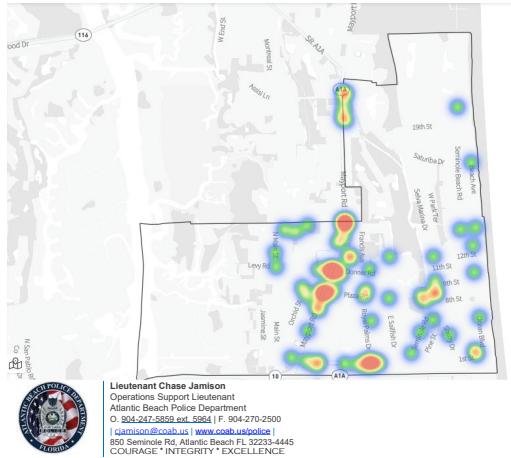

Citation data is attached in excel file encompassing all citations issued in tracs from 1/1 to 9/21 (at 145pm when I ran the report). 2,705 citations issued so far this year. For comparison, we issued 2,729 during the same timeframe in 2022 and 1,565 in 2021.

Crash data from Signal Four Analytics... FYI This only goes from 1/1/23 to 6/29/23. That's the max date available for these charts

Here's a quick snapshot of info on SBI and fatalities:

### Crash Heat Map:

Below is the parking information update from the last submission of Info

Will send updates crash and citation info as soon as we can pull it. Hopefully by the end of the day.

Please answer these inquiries from Ken Caudle inquiries as best as you can.

Did we get any further updates on the previously provided information –Parking Citations, Traffic Violations, Vehicle incidents, etc.? We need to keep this information flowing so that we are always working with accurate details in our discussions.

Did you get anything back regarding how we can engage with FDOT to determine how to modify the Sailfish and Sherry intersections into Atlantic so that left turns are not an option?

I would also appreciate it if you could provide a printed synopsis of the current ROW parking parameters.

Thanks,

Kevin
